

VIDEO CONFERENCING OPTIONS ZOOM ALTERNATIVES

"Men need spiritual nourishment now more than ever."

-Steve Bollman, Creator of That Man is You!

TMIY provides that nourishment and so much more. In a time of prudent precautions, meeting virtually provides a safe option for men to receive all that TMIY has to offer. And it works!

Virtual Options

With video conferencing becoming so common, there are a number of technology solutions available. Classes may choose the platform that best suits their needs. Articles, such as this [one](#), may assist you in your choice.

We used Zoom to build our guide for running TMIY virtually but classes can choose from many other options. Zoom was selected for its ease of use, quality of virtual video viewing, and breakout rooms (small group) feature.

Some of the most common video conference platforms are:

- [Google Meet](#)
- [Microsoft Teams](#)
- [GoToMeeting](#)
- [Webex](#)

Additional options can be found [here](#). Free accounts typically come with restrictions, such as length of the meeting and # of participants. The group will have to determine which factors are most important when ultimately selecting the right platform for them.
